

■ Chest X-ray Disease Detection Report

Generated on: 2026-07-07 12:05

Disease	Lung Opacity
Probability	65.77%
Risk Level	Moderate
Recommended Specialist	Pulmonologist

Description

Lung opacity is an area appearing whiter than normal on a chest X-ray due to fluid, infection, inflammation, or other abnormalities.

Symptoms

- Cough
- Shortness of breath
- Chest pain
- Fever

Possible Causes

- Pneumonia
- Pulmonary edema
- Cancer
- Inflammation

Treatment

- Treat underlying disease
- Antibiotics
- Oxygen therapy
- Medical evaluation

Prevention

- Healthy lifestyle
- Avoid smoking
- Vaccination

Emergency Warning

■ Seek immediate medical care if oxygen saturation falls below 90%, severe chest pain develops, or breathing becomes very difficult.
